

TECHNICAL DATA SHEET

PRODUCT

INDY VERIMAX
Alkaline Liquid Detergent

DESCRIPTION

INDY Verimax is an industrial alkaline liquid detergent for the cleaning of soiled surfaces.

APPLICATION

INDY Verimax can be used for the cleaning of walls, tiles, fibre-glass and other painted surfaces. A 10% solution in hot or cold water can be used, applied by swab or brush. The solution should be allowed to react for a few minutes and then flushed off with water. This concentration is generally suitable in most applications, though for heavily soiled surfaces, it can be increased to 20%.
