

## TECHNICAL DATA SHEET

### PRODUCT

**INDY DESCALING ACID**  
De-scaling compound

### DESCRIPTION

INDY Descaling Acid is based on citric acid used for the removal of heavy rust and scale from metal surfaces. The product is inhibited to limit attack on metal surfaces.

### APPLICATION

INDY Descaling acid is commonly used at 25-50% solution, in hot or cold water, (maximum 65°C) to remove rust and scale from metal surfaces. At this concentration it will not attack mild steel. Wash components after treatment.

### PACK SIZES

5 kg
