

PRODUCT

INDY GRAPHITE GREASE

Calcium-based Graphite Grease

DESCRIPTION

INDY Graphite Grease is a smooth textured dark grey/black grease with homogenous mixtures of premium quality base oils and additives. INDY Graphite Grease contains a calcium thickener incorporating finely dispersed lubricating graphite, which imparts excellent friction resistance and scuff prevention properties to the grease, even under extreme operating conditions. INDY Graphite Grease has a strong affinity to metal surfaces and a high resistance to water washout.

APPLICATION

INDY Graphite Grease can be used in open gears, as an overhead wire lubricant for trolley bushes, pump glands, link pins, as well as in rail and flanged lubrication equipment. INDY Graphite Grease is especially suitable for the lubrication of pantograph strips and contact wires as well as for steam locomotive pins, bogie centres and Syncrolift wire ropes.

TECHNICAL CHARACTERISTICS

Consistency NLGI	2
Dropping Point °C	90
Graphite Content	10%
Worked Penetration at 25°C	270-290
Colour (Visual)	Grey / Black
Thickening Agent	Calcium

PACK SIZES

50 kg, 15 kg, 5 kg

Revision 2: 27 May 2016

Durban Head Office: + 27 31 910 3111
