

TECHNICAL DATA SHEET

PRODUCT

INDY FORM RP Repress Oil

DESCRIPTION

INDY Form RP is a repress oil formulated to a low viscosity to allow for even coverage of components during the formation of sintered parts. The low volatility of INDY Form RP allows for rapid evaporation during the firing process.

APPLICATION

INDY Form RP is designed specifically for use in the manufacture of sintered automotive parts.

TECHNICAL CHARACTERISTICS

Appearance		Pale amber liquid
Density at 20°C	kg.m ⁻³	800 (typical)
Viscosity at 40°C	cSt	2.50 (typical)

PACK SIZES

210L, 20L
