

## PRODUCT

**INDY FORM CS**  
**Drawing & Forming Oil**

## DESCRIPTION

INDY Form CS is a neat, inhibited mineral oil, containing a powerful extreme pressure additive to provide exceptional anti-weld properties, smooth metal finishes and extended tool life. The extreme pressure additive is most effective in the temperature range between 150-550°C.

## APPLICATION

INDY Form CS is specifically designed for stamping and blanking on ferrous and non-ferrous metals. It can also be used in the drawing of sheet metal and other general heavy duty machining applications. INDY Form CS will not stain yellow metal.

## TECHNICAL CHARACTERISTICS

Appearance	Clear light brown oil
Density at 20°C	0.88 kg/l
Viscosity at 40°C	35-40 cSt
Flash point	220 °C

## PACK SIZES

210 lt  
25 lt
