

PRODUCT

INDY FORM SSB

Low Viscosity Drawing & Punching Oil

DESCRIPTION

INDY Form SSB is a high performance drawing & punching oil. It contains extreme pressure additives and is free from chlorine compounds. Its low volatility allows fast evaporation of the product.

APPLICATION

INDY Form SSB is used in its undiluted form for punching, drawing and rolling of iron, steel, stainless steel and aluminium. It has a relatively high vapour pressure and should be used in well ventilated areas. After evaporation, only a thin film remains, requiring minimal cleaning of the machined parts. Where cleaning is necessary, we recommend the use of Indy Suplex LF.

TECHNICAL CHARACTERISTICS

Appearance	Clear straw-coloured oil
Density at 20°C	0.80 kg/lit
Viscosity at 40°C	1-3 cSt
Flash Point (°C)	100

PACK SIZES

210 lt
25 lt
