

GRAPHITE GREASE

Product description

Indy Graphite Grease is a smooth textured dark grey/black grease with homogenous mixtures of premium quality base oils and additives. Indy Graphite Grease has strong affinity to metal surfaces and a high resistance to water washout.

Application

- Suitable for mining, quarrying, construction, cement, steel, paper, agricultural and general heavy-duty industrial equipment, including conveyors, crushers, mills and other slow- to moderate-speed machinery.
- Recommended for the lubrication of heavily loaded bearings, bushes, pins, pivots and other industrial components operating under high loads, shock loading and vibration.
- Can be used in open gears, as an overhead wire lubricant for trolley bushes, pump glands, link pins, as well as in rail and flanged lubrication equipment.
- Especially suitable for the lubrication of pantograph strips and contact wires as well as for steam locomotive pins, bogie centres and Syncrolift wire ropes.

Features & Benefits

- Contains a calcium thickener incorporating finely dispersed lubricating graphite, which imparts excellent friction resistance and scuff prevention properties to the grease, even under extreme operating conditions.
- The high-viscosity base oil provides a stronger oil film and is particularly useful for heavily loaded bearings and industrial equipment.

Physical Characteristics:

Properties		II
Dropping Point	°C	90
Graphite Content	%	10
Worked Penetration @ 25°C	mm	270-290
Thickening Agent		Calcium
Colour		Grey/Black

Available Product Pack Sizes:

Part No.	Pack Size
OIL-01387	50 kg
OIL-01388	15 kg
OIL-01389	5 kg
