

INDY

TECHNICAL DATA SHEET

INDY MAX DEXRON III H

Application

- ❖ Specially designed for use as an automatic transmission fluid, where the characteristics of a General Motors GM Dexron III fluid are required.
- ❖ Meets the performance requirements of a broad range of automatic transmissions.
- ❖ Designed for use in transmissions, power steering and hydraulic systems where a DX-III fluid is specified.

Features & benefits

❖ Refined Engine Cleanliness

Formulated with an additive blend incorporating anti-wear, corrosion inhibition, anti-foam and friction modification functionalities, that protects against shudder to ensure smooth, high performance application.

Provides good protection against power steering pump wear.

Gives excellent performance and long service life.

Suitable for use for the following specifications:

- ✓ Allison C4
- ✓ Ford Mercon
- ✓ GM Dexron III
- ✓ Caterpillar TO-2
- ✓ M2C 138 CJ/ 166 H

Physical Characteristics:

Properties		
Density @20°C	kg.m ⁻³	840
Viscosity @40°C	(cSt)	31.7
Viscosity @100°C	(cSt)	7.0
Viscosity Index		194

Available Product Pack Sizes:

Part No.	Pack Size
OIL-00665	210L
OIL-00666	20L
OIL-00667	20*500mL
