

MAX DX II

Product description

Indy Max DX II is an automatic transmission fluid comprising advanced additive technology that allows it to meet the specifications of a Dexron II fluid. Indy Max DX II meets the performance requirements of a broad range of automatic transmissions.

Application

- Principal application for this fluid is in automatic transmissions of passenger cars, designed for use in all transmissions, power steering and hydraulic systems where a DX-II fluid is specified.
- Also approved for use in certain transmissions used in commercial road vehicles and off-highway equipment.
- Recommended for use in power steering and hydraulic systems of vehicles and earth moving equipment.

Features & benefits

- **Refined Engine Cleanliness**
  Formulated with an additive blend incorporating anti-wear, corrosion inhibition, anti-foam and friction modification functionalities, that protects against shudder to ensure smooth, high performance application.

  Provides good protection against power steering pump wear.

  Gives excellent performance and long service life.

Suitable for use for the following specifications:

- ✓ Allison C4
- ✓ GM Dexron II
- ✓ Caterpillar TO-2

Physical Characteristics:

Properties		
Density @20°C	$kg.m^{-3}$	860
Viscosity @40°C	(cSt)	51.5
Viscosity @100°C	(cSt)	8.3
Viscosity Index		154

Available Product Pack Sizes:

Part No.	Pack Size
OIL-00669	1000L
OIL-00670	210L
OIL-00671	20L
OIL-00671AM	20L
OIL-00672	4*5L
OIL-00674	12*1l
OIL-00673	20*500mL
